

Y14084 & Y14085 - Beam Seater Assembly Guide

Tools Needed: Phillips Screwdriver

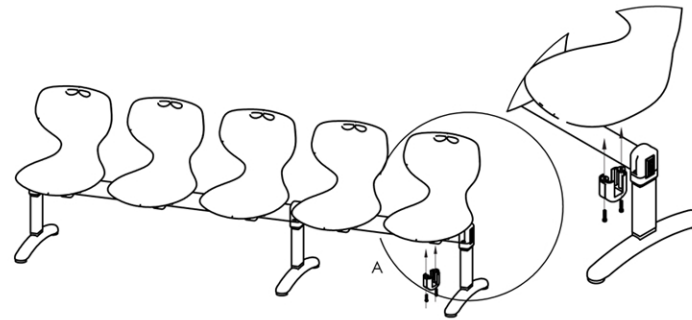

Step 1) Assemble legs as shown. Note: 5-Seaters will have a center leg. Insert one side of the beam into one of the end legs.

Step 2) Locate the U-brackets and seat brackets. Attach seat brackets to U-brackets as shown. Do not fully tighten. Leave loose to center seats once they are attached. If you have a 5-seater attach the center leg on the beam. Lastly, connect the other end of the beam to the other end leg.

Tip: Attach seats as shown above, with the seat resting over the longer overhang of the bracket.

Step 3: Attach seat shells onto seat brackets. Slide seats to their preferred positions and fully tighten the seat bracket screws to secure the seat into place.
